

Beer Bottle Bag Tutorial

Sized to fit most beer bottles (specialty or generic); adjust if needed.

Step 1: (to make one bag) Cut 2 pieces of main fabric 7x10½ inches.

Step 2: Cut 2 pieces of contrast fabric 7x2½ inches.

Step 3: Cut 2 pieces of flannel 7x12½ inches

Step 4: Place one piece of fabric right-side up on table—short sides at top and bottom. Place the contrast fabric on top, matching raw edges along the top short side. Pin in place and sew a ¼-inch seam. Repeat for the other half of the bag. Press seams toward bottom of bag.

Step 5: Place one piece of flannel on table—short sides at top and bottom. Place the 2 pieces of fabric panels (right-sides together) on top of that. Then lay the other flannel piece on top of that. Pin in place.

Step 6: Sew a 3/8-inch seam around three sides, leaving the top (with the contrast fabric) short end of your bag open. Trim corners and then trim the three sewn sides to about ¼-inch.

Step 7: Turn right-side out. Moving around the top of the bag, turn under ¼ inch and press. Turn again another ¼ inch, press and pin in place. Top-stitch 1/8 inch around the bag's top.

Step 8: Insert your specialty beer bottle and tie a ribbon around the bag (bottle neck area).

Please do not use my tutorial to make items for commercial sale.
