Introduction

Well first of all, if you do not know what ShareCash.org is; ShareCash.org is a site which allows you to of course upload files and share them. Not only that, they actually pay you for it. Only thing is that you have to fill in a survey before you can download the actual file. The same goes for FileIce.net and various other sites, which will work just as effeciently as with ShareCash and FileIce. (Examples: www.fileserve.com, www.uploading.com and www.filesonic.com)

If you are wondering what the difference is between fileice and ShareCash is, well, I've heard that FileIce pays more than ShareCash. But I'm not certain. I use ShareCash, but you can pick either one. I know that ShareCash pays between \$300 and \$600 USD per 1,000 downloads. And that's good enough for me.

Now after you've learned all the methods I will teach you in this eBook, you should be able to profit AT LEAST \$50 USD per day. But don't think it's all relaxing. You have to put in some serious work before you will start profiting for good. Just like any other LEGIT method. All online money making requires work in the beginning.

Another note: All these methods might not work quite as well as when I started using them. But they will still work very well, and you should still be able to profit alot from them.

Let's begin!

The Basics:

Shall we? Now first of you of course want to register on either ShareCash or FileIce. There is no sign up fee on neither of the sites. Although you have to apply to register on FileIce. I'm assuming you all know how to sign up, etc. So let's skip that step.

Basic infomation on the use of ShareCash:

You can upload your files by pressing the 'Upload' button in the sidebar at the left. Adobe Flash Player is required to use the the uploader. You can also upload your files by using FTP. Your FTP information is described below the uploader. Click add to browse for your file, press okay, and then upload. When your file is upload it will be in the main folder in the 'Uploads Manager'. To find the download link of your file, hover your file and click on 'Details'. You will then see your file URL.

This is all really basic information, I know. But just in case someone might have found this difficult, I added it anyways.

1; YouTube

Now, this is actually one of the easiest things to begin with. Since most/alot of you are already familiar with YouTube, it will make everything alot easier. That's why I thought it would be the best start. And another important aspect, people browsing for stuff on YouTube will download ANYTHING.

So start off you're of course going to need a YouTube account. Preferebly one with no videos, but as old as possible. I am not going to go in depth in why this matters.

Next step, go to Daily Motion, XVIDEOS, Pornhub, basicly anything where you can find striptease videos. Now, what you are going to be looking for is preferebly something where the girl gets naked at some point.

When you've found a /few/ video with stripteases which fill in the requirements, you are going to use www.keepvid.com to download the videos. If keepvid doesn't support the site you can just Google: "site name video downloader", and you'll get positive results.

So once you've downloaded the striptease videos you are going to load up your favourite video editing software, because we are going to do a little editing. What you want to look for in the striptease videos is where the girl is about to show some skin, either ass or boobs. And you are going to quick fade out the video right before she is about to show either. Then add a text on the video saying: "Link to rest of the video in the description!".

Upload the edited video to YouTube with an attracting title and some nice tags. Example title: "Hot Teen Girl With Big Boobs Strips Naked", whatever. Take a look on www.pornhub.com to get inspiration.

Now you're going to upload the entire video to ShareCash.

Add the download link to the description. And you should probably add a tinyurl to you link. Make sure the download link doesn't show up in the description before you press the "Show more" button.

You can use bots and sites like www.eazysubs.com and www.subxcess.com to get likes, views and comments to boost your video traffic. Do this with about 5-10 videos and you should start seeing results after a while.

That about concludes everything to the YouTube method.

2; Forums

Using forums is one of my favourite methods to spread my sharecash links. However, the efficiency of this has decreased through time. Bummer. Still generates loads of money if done correctly.

And there is, unfortunately, one more big minus. This is not a sit-back-and-relax method. This requires work daily. Why? Since the porn password usually die off after a few days, you will have to post (a) new thread(s) daily. But of course if you are willing to do that, this is a great method.

Some forums don't allow ShareCash link though. In order to solve this we are just going to create a simple blogspot website where you post the downloads instead. Really simple.

First thing you can share on forums; is porn passwords.

Now if you choose to either crack these yourself or just leech them from other forums is your own choice. Assuming you are just going to leech, let me redirect you to a few forums where you can get free porn passwords daily, and repost them if you wish:

<http://www.porn-w.org>

<http://forum.dumpstersluts.com>

<http://fknoWned.com>

<http://entnt.com/forum-18-1.html>

You can find more forums by googling.

Next step: Create accounts on all the forums you wish to post porn passwords on. You might want to get a few posts on the accounts before you begin posting the porn passwords yet.

Assuming you've done all that, start leeching the porn passwords. Preferably from today. What you are going to do is pack them in .RAR/.ZIP files, re-upload them and post them again on the forums. Remember to delete the credits, if any. And like I stated earlier you might want to make a blog where you post the links instead of posting them directly. This will probably work for quite a while until they find out. If you start getting alot of traffic to your blog you can also apply for google adsense to make some extra cash, but that's not what this eBook is about.

That about concludes everything for the porn passwords.

Another way to make money through forums is by sharing various content. All depending on the forum theme. For example, this is Hack Forums. Now let's say I am a really good programmer. Then I would programme a crypter/bot anything that is in general interest to the forum. This example of course requires lots of work. Then you just share the download link with a sharecash link. It is specifically very efficient with crypters on HackForums, since alot of people don't want to pay for crypters.

3; Blogs

People love to download free stuff. You can actually share anything you want to on your blog. As long as it can be downloaded.

Examples: Game hacks/cheats, Free PC fixing applications, Hacking applications (R.A.T's, Keyloggers, etc.)

However, this will require investments for optimal results. You will preferebly have to purchase a domain and SEO your site reguarely to improve traffic and Google page rank.

4; Taking Advantage of Big News

This method can give amazing results if you are lucky and do it right. What you will aim for is looking for some of the biggest news around the globe. Example: Internationally famous celebrity dead. For an example you could post a R.I.P wallpaper of him/her. If you can't find one on Google Images, one can be done in 2 minutes in Photoshop/Gimp. All you have to do is add an image of him/her and a text saying the name, born-death and R.I.P.

Then encourage people to download it and use it as their wallpaper.

You can look on Yahoo news for the latest news. Celebrity nudes is also a great way to get downloads, if you are fast. Try to keep all your posts on the same blog.

Making up lies is also fine. Let's use celebrity nudes for an example. A lot of people are interested in getting their hands on them.

Example: NEW LEAKED EMMA WATSON NUDE PICTURES!
Whatever people find interesting. Do your best to write a fake news story, and make it look like you copied it off some big news site.

5; E-Whoring

I've named this E-Whoring, because that is basically what it is. It is actually a really simple concept which doesn't require too much work more than once. This doesn't cash in quite as good as the other methods though.

You will be using either Myspace or Facebook in this method. Or of course both if you wish.

What you are going to be looking for first is some picture packages of some hot girls. E-Whoring picture packages. Once you've found a few nice ones, you are going to create your account(s), and give it some cute girl name and add a somewhat 'normal' profile picture.

Edit your info to something like this: "Heyy I'm name, check out some of my pics: [tinyurl'd sharecash link](#)".

Next step is to get some friends. This isn't too difficult actually. All you want to look for is an email list, and add your friends by email. Try to look for the most recent email list you can find. The bigger the better. You are going to need as many friends as you can per account. Try not to use the same email list more than twice.

You can usually find free email lists on:

www.fkn0wned.com
www.hackforums.net

It's pretty much the same thing for Myspace

I think you're about getting what this is all about. The only thing you wan't to focus on, is finding out what people are interested in.

Playboy magazines, cracked Wii games, comics, magazines, porn, leaked music, etc.

You all get the drill. Follow everything I told you and keep expanding and you will earn lots and lots of money.

Well I hope this eBook has been helpful to you and has helped you understand the different ways of making lots of money on ShareCash, FileIce, FileSonic, FileServe, etc.

Thanks for reading!
